DETAILED ACTION

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

1. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Claim Objections

2. Reference characters corresponding to elements recited in the detailed description of the drawings and used in conjunction with the recitation of the same element or group of elements in the claims should be deleted so as to avoid confusion with other numbers or characters which may appear in the claims.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1, 3, 5, 7, and 8, the recitation of the structural member "stator (11)" is confusing since the specification discloses a "stator (5)" and a "plate (11)". The examiner is not sure as to which structural element between the "stator" and the "plate" is being claimed". For examination purposes, the examiner has assumed that Applicant intended to claim the "plate (11)".

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3726

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3, 5-7, and 10-14, *as best understood by the examiner*, are rejected under 35 U.S.C. 102(b) as being anticipated by Boyadjieff (US Patent 4,625,796).

Note: the examiner is assuming Applicant through out the claims meant "plate (11)" instead of "stator (11)".

For claims 1, 10, and 14, Boyadjieff discloses an apparatus and a method for facilitating the connection of tubulars using a top drive 19, the apparatus comprising a plate 48 attachable to the top drive, and a supporting member 44 for supporting a tool 21 wherein means 158 are provided to allow substantially horizontal movement of the supporting member, see column 5, lines 1-14 and figures 2 and 3.

For claims 2 and 6, see column 3, lines 39-52.

For claim 3, see rigid member 159 arranged on axle 160, figure 5.

For claim 5, elements 46 are equivalent to Applicant's claimed pistons and cylinders.

For claim 6, see column 5, lines 35-39.

For claim 7, Applicant should note that the provision of a mud pipe is conventional in the art, see element 49 for example.

For claim 11, the supporting member 44 of Boyadjieff is integral with the tool 21.

For claim 12, tool 21 grips tubular 60.

For claim 13, the apparatus of Boyadjieff includes top drive 19.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boyadjieff.

With regards to claim 8, Boyadjieff discloses an apparatus for facilitating the connection of tubulars using a top drive as shown above except for the mud pipe being movable in relation to the stator and the supporting member about ball joints. However it would have been obvious to one of ordinary skill in the art at the time the invention was made that the provision of ball joints for the movement of the mud pipe is a matter of design choice wherein no stated problem is solved or unexpected result obtained in using ball joints to move the mud pipe versus the arrangement taught by Boyadjieff.

For claim 9, using a hydraulic motor as a supporting member is a matter of design choice wherein no stated problem is solved or unexpected result obtained in using a hydraulic motor for the supporting member versus the supporting member taught by Boyadjieff.

Art Unit: 3726

Allowable Subject Matter

9. Claim 4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
